SUMMARY

Software Engineering graduate with a focus on system, game, and software testing development. Enthusiastic about learning and experiencing things, whether that be code, technology, people or culture.

EXPERIENCE

Software Engineering Intern

Cohu Malaysia Sdn. Bhd.

March 2025 – August 2025, Melaka, Malaysia

- Developed and executed unit tests for test handler machine modules to improve reliability and maintainability, contributing to codebase stability and reducing technical debt.
- Analyzed existing code and implemented test cases using MSTest.
- Prepared a comprehensive training document to onboard future interns and junior developers, enhancing team knowledge sharing and reducing ramp-up time.
- Collaborated with senior engineers to understand system architecture and ensure compatibility of test suites with other ongoing development work.

PROJECT

Indera's Quest 2D Platformer with Malaysian Mythology Themes

- Lead a team of 4 to develop a platformer centered around Malaysian folklore.
- Implemented engaging movement mechanics using C#
- Learned how to utilize Unity's physics engine for a 2D setting.

Prototype E-Munakahat Pahang Couples Marriage License Application Website

- Lead a group of 4 to plan, develop and test a web-based system for couples in Pahang to register a marriage license
- Developed both front, back-end and database for marriage registration module using HTML, CSS, JavaScript and phpMyAdmin.

Prototype KAFA Enrollment Platform KAFA Enrollment Website

- Collaborated in a group of 4 to develop a system for parents to enroll their primary school children for extracurricular KAFA activities
- Learned how to use Github for more effective collaborative work
- Developed both front, back-end and database for using PHP, Bootstrap, JavaScript and phpMyAdmin.

Bloodseeker Anemia Prediction Platform

- Utilized Jupyter and scikit-learn to develop the machine learning model
- Utilized Flask to create the website
- Developed a website to boost anemia awareness.

Between Fears 3D Third Person Horror/Puzzle Game

- Lead a team of 4 to develop a horror game with puzzle elements
- Learned how to use Blender and GIMP to create assets and UV layouts
- Learned how to develop game events and interactions in a 3D space.

EDUCATION

Bachelor of Computer Science (Software Engineering) with Honors

Universiti Malaysia Pahang Al-Sultan Abdullah • Pekan • 2021 – 2025 • 3.34 / 4.00

Law Foundation

Universiti Teknologi MARA • Dengkil • 2020 – 2021 • 3.84 / 4.00

SKILLS

Microsoft Excel, Microsoft Word

C#, Java, C++, PHP, JavaScript, Python, MySQL, Lua, HTML, CSS

Unity, Laravel, GitHub, Figma, Blender, Laragon, Microsoft Visual Studio, PHPMyAdmin, Flask
